

CALL FOR PAPERS

**19th International Workshop on Inorganic
and Organic
Electroluminescence
&
2018 International Conference on the
Science and Technology of
Emissive Displays and Lighting**

September 11-13, 2018

**Meiji University
Tokyo, Japan**

Host Organization

- The 125th Research Committee of JSPS
- The 142nd Research Committee of JSPS

Financial Support

- Japan Society for the Promotion of Science (JSPS)

EL2018 CALL FOR PAPERS - PLEASE CIRCULATE AND POST -

Conference Chair

Junji Kido (Yamagata University, Japan)

Conference Co-Chair

Chihaya. Adachi (Kyushu University, Japan)

Conference Secretary

Noboru Miura (Meiji University, Japan)

Honorary Adviser

H. Kobayashi

(Tottori Univ. (Prof. Emeritus), Japan)

Yoichiro Nakanishi

(Shizuoka Univ. (Prof. Emeritus), Japan)

Co-Sponsored by

- Meiji Univ.
- Konica Minolta Science and Technology Foundation

In Co-Operation with

- The 162nd Research Committee on Wide Bandgap Semiconductors Photonic & Electron Devices, Japan Society for the Promotion of Science
- The Japan Society of Applied Physics
- The Institute of Electronics, Information, and Communication Engineering
- The Institute of Image Information and Television Engineers
- The Illuminating Engineering Institute of Japan
- The Electrochemical Society of Japan
- The Phosphor Research Society of Japan
- Research Group on Electrical and Electronic Properties of Polymer and Organics, The Society of Polymer Society, Japan
- Japan OLED Forum

FOREWORD

The 19th International Workshop on Inorganic and Organic Electroluminescence & 2018 International Conference on the Science and Technology of Emissive Displays and Lighting (EL2018) will be held at the Meiji University in Tokyo, Japan from Tuesday, September 11, to Thursday 13, 2018. This is a continuation of a series of international workshops started in 1980 on inorganic electroluminescence, and expanded in 1988 to include organic electroluminescence. In 1995 the International Conference on the Science and Technology of Display Phosphors was initiated. From 2002 the two events merged, and since then they have been held biannually.

SCOPE

The scope of the workshop covers all aspects of basic and applied researches on both inorganic and organic electroluminescence (EL), and other light emitting materials and their science and technologies, as well as the applications. The latest results on materials, preparation, physical properties and application of EL devices and phosphors will be discussed. The following topics of current interests and included, but contributions to other related subjects are also encouraged and welcome.

1. Organic EL Materials and Devices

- organic materials and polymer materials
- device physics and engineering

2. Inorganic EL Materials and Devices

- physics and chemistry of inorganic materials
- characterization and modeling of EL devices

3. Phosphors and Quantum Dot (QD) Technology

- inorganic phosphors, processes and devices
- QD phosphors and QD light emitting diode (QLED)

4. Application and Other Related Materials

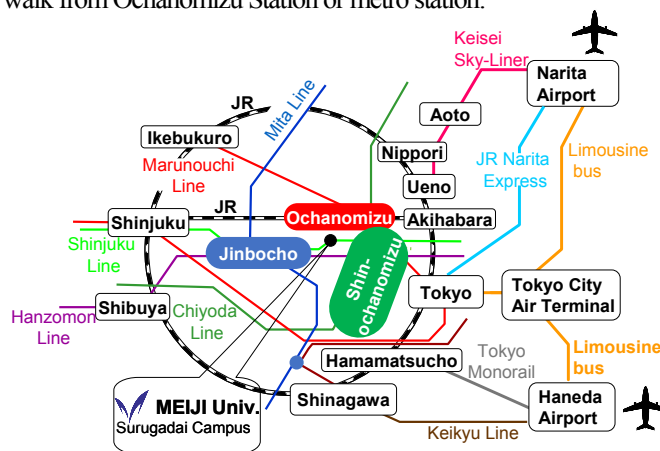

- displays and lighting, flexible devices
- insulators, electrodes, substrates and film transistors

The aim of the Workshop is provide a stimulating and informal atmosphere for discussion on subjects of common interest for

scientists and engineers working on inorganic and organic EL and related areas.

LOCATION

MEIJI university is located at the heart of Tokyo, and can be reached from Narita and Haneda International Airports within 1 hour. From Tokyo Station to Ochanomizu Station (the closest station to Meiji University) takes just 5 minutes by train. The campus is a 6-minutes walk from Ochanomizu Station or metro station.

SUBMISSION OF ABSTRACTS

The deadline for the submission of abstracts for contributed papers is **May 7, 2018**

A 200-words abstract is required. The abstract should include the objectives and the specific results. Attaching one figure or table on the abstract is accepted.

The abstract should be submitted electronically, no later than May 7 2018. A detailed instruction is available from the conference WEB site: <http://www.el2018.org/>

Upon acceptance of your 200 words abstract, your abstract will be published on the workshop. Decision of acceptance / non-acceptance will be delivered to be corresponding authors in early June.

LATE NEWS PAPERS

A limited number of the late news papers, describing the latest unpublished results, will be included in the program. The deadline for the late news submission is **July 20, 2018**.

PROCEEDINGS

As conference proceedings, a special issue of the Japanese Journal of Applied Physics (JJAP) is scheduled to be published. The deadline of submission is **October 31, 2018**

REGISTRATIONS & ACCOMMODATIONS

Workshop registration information and Hotel reservation form will be posted on the WEB site.

Closing dates for the online registration and payment

- Early Bird Registration: **June 29, 2018**
- Late Registration: **August 17, 2018**

CONFERENCE FEE

	Early Registration		Late Registration & Onsite Registration	
	Registration Fee	Banquet Fee	Registration Fee	Banquet Fee
Regular	JPY 40,000-	JPY 10,000-	JPY 50,000-	JPY 10,000-
Student	JPY 20,000-	JPY 10,000-	JPY 30,000-	JPY 10,000-
Accompanying Person	JPY 10,000-	JPY 10,000-	JPY 10,000-	JPY 10,000-

FURTHER INFORMATION

Updated information on the workshop will be presented in the workshop homepage;

<http://www.el2018.org/>
